

Large commercial rates E63 and E 65 sign up

Now you have a choice about where your energy comes from!

Yes! Sign me up for Greener GMP!

Thanks for your interest in renewable energy. And for your interest in taking action to preserve our natural resources. When you sign up for "Greener GMP," Green Mountain Power will purchase certified renewable resources available on the New England power grid equal to the portion of electricity you have designated. When Vermont projects are available, they will receive a priority consideration.

You can choose to have Green Mountain Power designate renewable resources equal to 10 percent of your monthly use. You may sign up for additional portions in multiples of 10 with Company permission. The additional premium for Greener GMP for Rates E63 and E65 is currently 3.425 cents per kilowatthour for businesses that sign up in 2007.

To get an idea of what your additional monthly cost would be, multiply your average number of kilowatthours used by 10%, then by 3.425 cents. Remember, your actual use varies month to month, so the total monthly charge for Greener GMP would vary as well. If Green Mountain Power overall rates increase due to increases in energy costs, the premium for Greener GMP will actually decrease.

I'd like to participate in Greener GMP. I would like to participate at the:

10% _____

I would like to discuss signing up at a higher level _____

Am I eligible for this rate?

You are if you meet these criteria:

I am a Green Mountain Power Rate E63/E65 customer.

I have had a good Green Mountain Power credit history for the past six months.

I have read and agreed to the terms and conditions below and I meet the eligibility requirements outlined above.

Name _____

Business name _____

Service address _____

City/town _____ State ____ Zip _____

Green Mountain Power account number: _____

Phone number during the day, including area code: ____ - ____ - ____

Email address (we will not give out your email address) _____

Mailing address (if different)

City/town _____ State ____ Zip _____

Signature (required) _____

Terms and Conditions:

1. Green Mountain Power will purchase certified renewable resources from Vermont and New England equal to the portion of my usage I have designated. When Vermont projects are available, they will receive a priority consideration.
2. I will pay an additional amount of 3.425 cents per kilowatthour above and beyond the Green Mountain Power tariff Rate E63/65 in effect. This premium is subject to change. If Green Mountain Power overall rates increase due to increases in energy costs, the premium for Greener GMP will decrease. If Green Mountain Power rates decrease due to decreases in energy costs, the premium for Greener GMP will increase.
3. I understand that Greener GMP will be taxed at the same rate as Rates E63 and E65.
4. Greener GMP is a five-year commitment, by calendar year. I understand I may withdraw at any time, but cannot sign up again until the end of the original five-year period.
5. I understand that I may not change the percentage level of my commitment during the five-year period. Once I have signed up for 10% or more of my electrical usage to be billed at the Greener GMP premium, that level will remain in effect throughout the five years, unless I withdraw from the program.
6. I understand that eligibility is limited to Rate E63/65 customers with an account that is current and who have paid all charges for electric service during the previous six billing months on time.
7. I understand that if I do not pay my Green Mountain Power bill within 64 days of the date of the bill I will be removed from the Greener GMP program. I understand I will be responsible for all charges accrued while I am on the rate.
8. Greener GMP will go into effect with my next billing. Participation expires on December 31, 2011.
9. I understand that signing up for Greener GMP does not change the electrons that provide service to my home. Due to the complexity of the power grid and the laws of physics, actual electrons flow to the nearest need and cannot be directed to specific locations. I recognize that through Greener GMP I am financially supporting qualifying new renewable energy sources that will be connected to the New England electric grid but not necessarily directly to my home.
